

Modified Mini Mental State Examination (3MS)

Teng E.L. and Chui, H.C., (1987).

The Modified Mini-Mental State Examination (3MS)

Directions for use

The questions are put in the order of appearance and the score of each question is managed immediately. In order to obtain co-operation of the patient, it is necessary to install the patient comfortably and to exert a positive reinforcement. It is important not to influence the answers and to avoid the pressure on the items where the patient is in difficulty.

Direction for scoring

For the various parts of the test, the score has to allot depends on the type of question. For the majority of the questions, a point is allotted by correct answer. For the others items, quotation to be allotted is indicated clearly in the test. The difficulty in the attribution of the 3 ms scores is that it combines also the score of the MMSE, which can disturb the user.

The Modified Mini-Mental State Examination (3MS)

Directives d'utilisation:

Les questions sont posées dans l'ordre d'apparition et le score de chaque question est administré immédiatement.

Afin d'obtenir de la coopération du patient, il est nécessaire d'installer le patient confortablement et d'exercer un renforcement positif.

Il est important de ne pas influencer les réponses et d'éviter la pression sur les items où le patient est en difficulté.

Directives pour l'attribution du score

Pour les différentes parties du test, le score à attribuer dépend du type de question.

Pour la plupart des questions, un point est attribué par réponse correcte. Pour les autres items, la cotation à attribuer est indiquée clairement dans le test.

La difficulté dans l'attribution des scores du 3 MS est qu'il combine aussi le score du MMSE, ce qui peut perturber l'utilisateur.
